Cabinet Construction: Casal Outdoor Collection cabinets are factory built to order with precision dowel alignment and a fast cure solvent free structural marine adhesive system that provides excellent flexibility, toughness and bond strength.

Installation to Exterior Walls: Casal Outdoor Collection can be installed indoors or out. To fasten cabinets to stucco, brick, or concrete block walls, stainless steel Tapcon® fasteners are recommended (3/16" x 2 3/4"), sold separately. For base cabinets two fasteners are recommended, and four are recommended for wall cabinet installations.

Salt Water Environments: Oceanfront environments with salt air and sea spray will require regular maintenance and cleaning to prevent rust from forming on the handles, hinges and drawer runners. Clean stainless steel surfaces several times a month to keep the chemical reaction from the salt from gaining a foothold on the hardware. With regular cleaning, your cabinets will look like new for many years. To achieve maximum corrosion and stain resistance, the surface of the stainless steel must be kept clean.
